REPORT OF RECREATION COMMITTEE

1964

1964 saw one major problem solved with the installation of a pump, and a large drainage field up in the parking lot to handle our very troublesome sewerage condition, due to the high water table down near the lake. This installation also serves to insure that the swimming area does not get contaminated.

The improvement of Richardson Park has been very gratifying, but much more needs to be accomplished. The building in the refreshment stand area needs major work done on it. We would like to add swings and slides for the small children, a source of fresh drinking water, and eventually seal the parking area. Still further in the future new dressing rooms, possibly in a separate building that will provide better ventilation, and be easier to keep clean.

We are also hoping that our income will allow us to support a full time life guard, during the days of peak useage, in years to come.
